POTASSIUM IODIDE (KI) APPLICATION FORM FOR STAFF

The Nuclear Regulatory Commission has enabled School Administrative Unit 50, 48 Post Road, Greenland, New Hampshire, on behalf of each staff member who works at an SAU 50 school in the Emergency Planning Zone (EPZ) surrounding either Seabrook Station or Vermont Yankee, to receive one 130 mg tablet of Potassium Iodide from the State of New Hampshire to use in the event of a radiological emergency.

PLEASE CHOOSE ONE OF THE FOLLOWING OPTIONS:

_____ I **DO NOT** want SAU 50 to obtain one 130mg tablet of potassium iodide (KI) for me.
Please sign the bottom of the form and return it to the school nurse.

_____ I **DO** want SAU 50 to obtain one 130mg tablet of potassium iodide (KI) for me.
Please complete the remainder of the form and return it to the school nurse.

Name: _____

Address: _____

Telephone: (_____) _____

By completing and submitting this application to receive potassium iodide tables from SAU 50, I understand the following:

- The use of Potassium Iodide is voluntary. I am not required to accept it or use it.
- Potassium Iodide is **NOT** a substitute for evacuation. Evacuation is the most effective protective action in the event of a radiological emergency.
- Potassium Iodide protects only the thyroid gland from only radioactive iodine. In a radiological release, I would still be vulnerable to possible exposure to other forms of radiation.
- Children under the age of fourteen are most at risk from the effects of radioactive iodine on the thyroid gland.
- Although KI is generally safe, it can cause health risks in persons with existing thyroid conditions and those with allergies to iodine or shellfish. Anyone considering using Potassium Iodide should consult with his/her health care provider.
- I assume full liability for using Potassium Iodide.
- This application is for the duration of your employment in an SAU 50 school. Please contact the school nurse if any of the above information changes.
