

HOMEWORK

Homework is assigned to reinforce skills or to prepare for or to extend a classroom activity. Homework also can help students develop responsibility and organizational skills.

Teachers will establish homework procedures and standards appropriate to their levels and see that these are communicated to parents. Homework missed during a non-school calendar vacation will be made up within two weeks after the student's return. It is the student and parent's responsibility to obtain the assignments after returning from vacation.

Adopted 2001
